CONTACTORS

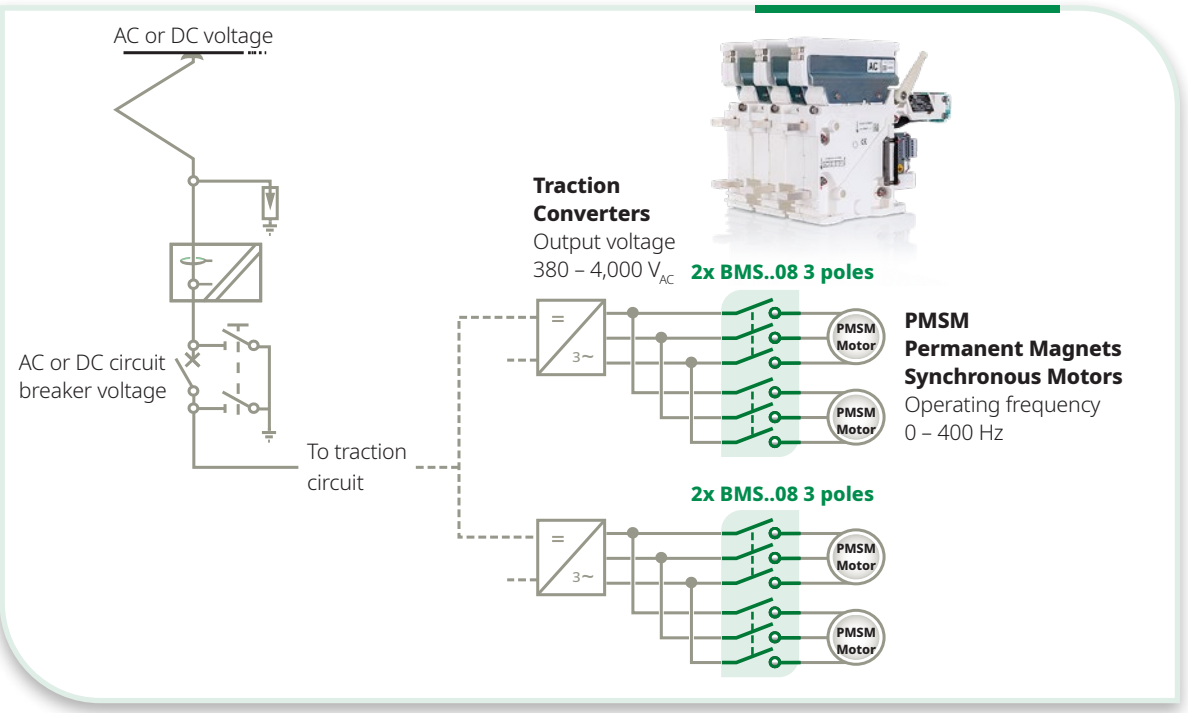
Type **BMS...08**
for Permanent Magnet Synchronous Motors

RAIL VEHICLES

GENERAL INFORMATION

The **BMS** contactor, with more than one hundred and fifty thousands units in operation worldwide, is a contactor valued by the car builders and operators of electric traction vehicles for its strong performance level and its extremely high reliability. With its high modularity, the BMS offers variants and options that enable our customers to find the most appropriate version to fit their applications. For rolling stock equipped with Permanent Magnets Synchronous Motors (PMSM motors), the BMS...08 contactor series offers a large range of configurations to connect and isolate the traction inverters and the PMSM motors, for voltage up to 4,000 V_{rms} and frequencies from 0 to 400 Hz, and currents up to 800 A (@50 Hz) or 400 A(@400 Hz). Its heavy duty class, high breaking capacity, combined with a high insulation class and robust EMC performances, make the BMS...08 the best market choice for this type of application.

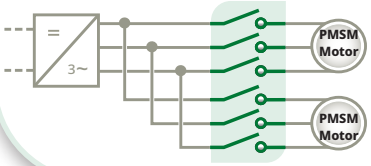
APPLICATIONS, TYPICAL EXAMPLES



Based on the vehicle's safety and failure modes analysis, the most preferred contactor's configuration will be selected among the following possibilities.

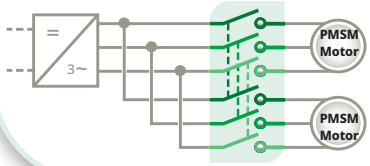
BMS..08 1 POLE

6x BMS..08 1 pole



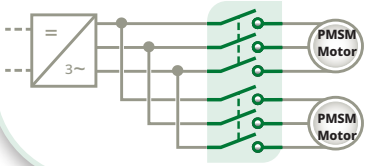
BMS..08 2 POLES

3x BMS..08 2 poles



BMS..08 3 POLES

2x BMS..08 3 poles



MAIN FEATURES

- Normally open and bi-directional contactor.
- Rated voltage 2,000 V_{rms} (BMS09.08) or 4,000 V_{rms} (BMS18.08).
- Conventional free air thermal current 800 A @ 50 Hz & 400 A @ 400 Hz.
- Low voltage control coil protection against surges.
- Suitable for ambient temperature from -40°C to +70°C.
- Reference standards IEC/EN 60077-2, IEC/EN 61373, EN 45545, EN 50567.

MAIN BENEFITS

- 1-pole configuration or 2-pole and 3-pole with mechanical link between poles
- High rated insulation voltage up to 4,800 V_{rms}.
- Operating frequency up to 400 Hz.
- High making & breaking performances.
- Also efficient to interrupt currents at 0 Hz for voltage up to 1,800 V.
- Very compact size and extremely low weight.
- High mechanical and electrical durability.
- Horizontal and vertical mounting.
- Low maintenance requirements with easy access to the main contacts.
- BMS design worldwide service proven.

DESIGNATION CODE FOR ORDERING

- Be sure to establish the designation code from the latest version of our brochure by downloading it from the website: www.secheron.com.
- Be careful to write down the complete alphanumerical designation code with 17 characters when placing your order.
- For technical reasons some variants and options indicated in the designation code might not be combined, therefore validate your configuration with Sécheron before ordering.
- For other configurations not described in the brochure, please contact Sécheron.
